ABOUT ME

AI Engineering student at 42 Paris, passionate about Generative AI, LLMs, and AI-driven innovation. Experienced in building AI solutions end-to-end and translating them into business value, with growing interest in AI adoption, benchmarking, and cross-functional collaboration. Comfortable working with both technical teams and business stakeholders to bring AI use cases to life.

EDUCATION

42 Paris - RNCP 7 | 2026-2027

AI Software Engineer

Advanced studies in Software Engineering, Data Science, and Artificial Intelligence

1337 Coding School - 42 Morocco - Junior Developer level | 2023-2026

Digital Technology Architect

Software Engineering, system programming, algorithms, software architecture, and full-stack development.

University of Khouribga Morocco - Excellence Bachelor's Degree | 2024-2025

AI Engineer

Information Systems, Artificial Intelligence, and Data Science

WORK EXPERIENCE

IG GREEN TECH | February 2026 - August 2026

AI Software Engineer Intern

- Natura AI: Built an AI platform for project feasibility analysis using RAG, LLMs, BM25, embeddings & Ollama.
- Aldric: Built an enterprise GenAI platform for content automation using AI Agents, RAG, LangChain, pgvector & n8n.

Talio Talent | October 2025 - March 2026

AI Software Engineer Intern

- AI-AUDIT: Built a 3D AI chatbot using UNITH, Next.js, Node.js, PostgreSQL & OpenAI.
- Talio AI Assistant: Built a local AI assistant using FastAPI, LangChain, RAG, embeddings & Ollama.
- n8n Automation: Built AI-powered workflows for billing, feedback & API integration.

SKILLS

- Generative AI: LLMs, AI Agents, RAG, LangChain, Ollama, Embeddings, Prompt Engineering
- AI Automation: n8n, AI Workflows, API Integration, Knowledge Management, Document Processing, Content Generation
- AI Tools & Platforms: ChatGPT, Claude, Gemini, Copilot, Gamma
- Office & Productivity: Microsoft Office Suite (PowerPoint, Excel), Google Workspace
- Data & ML: Python, Pandas, Scikit-learn, PyTorch, TensorFlow, SQL, PostgreSQL
- Software Engineering: C, C++, TypeScript, FastAPI, Next.js, React, Node.js, Docker, Git

PROJECTS

- AI Product Recommendation Engine – increased relevance of suggested items by combining collaborative filtering with LLM-based re-ranking.
- AI-Powered Medical Decision Support AI platform to help doctors analyze complex clinical cases
